November 19, 2020

Subject: A joint statement by Norwood Public Schools and San Miguel County Public Health

San Miguel County Public Health has been working closely with the Norwood Public School Administration to identify possible COVID-19 exposures and assess risks associated with a positive staff member. We are confident that we have worked through this week's schedules determining exposure levels and identifying close contacts of the staff member.

If you have been identified as a close contact, Public Health will be contacting you with further information within the next 24 hours. Free COVID testing will occur next week for those who have been identified as close contacts. Details surrounding date and time of the testing will be communicated by Public Health soon.

In the meantime, if you become symptomatic please stay home, contact your medical care provider and quarantine for 10 days from the time symptoms first occur. The ideal date for testing will be next Wednesday, November 25th, please do not reach out to the Uncompahgre Medical Center unless you are symptomatic.

If you have any questions or concerns, please do not hesitate to reach out to Public Health directly by emailing publichealth@sanmiguelcountyco.gov.
